

Secure Electronic Form and Comprehensive Document Management

The transition from paper-based processes to digital workflows is imperative for organizations striving for efficiency and competitiveness. The adoption of electronic form, electronic signatures, and electronic document management systems plays a vital role in this digital transformation.

These technologies help accelerate business processes, reduce mistakes, improve transparency, and enhance security, helping the organization become fully digital.

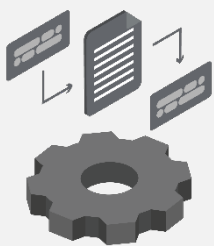

AccessMatrix Digital Form is a secure electronic form and comprehensive document management solution with easy-to-use online form builder that allows you to create online forms, define workflows, manage approvals, digitally sign, track requests and check document authenticity.

Key Features

Integrated Form Designer

Integrated Form Designer enables users to create and customize complex online forms with built-in workflows, accessible through web browsers on PCs, tablets, and mobile phones.

Flexible Workflows & Document Management

Enable seamless collaboration by assigning roles and permissions to internal and external users, ensuring efficient form creation, submission, and automated routing.

Integrated e-Signature & Document Validation

Supports both e-Signatures and Digital Signatures to ensure the authenticity and legality of e-Documents by capturing key details and verifying the signer's identity. It offers instant document authentication via a patented QR code, enabling users to quickly detect any modifications.

Multi-Language Form Friendly

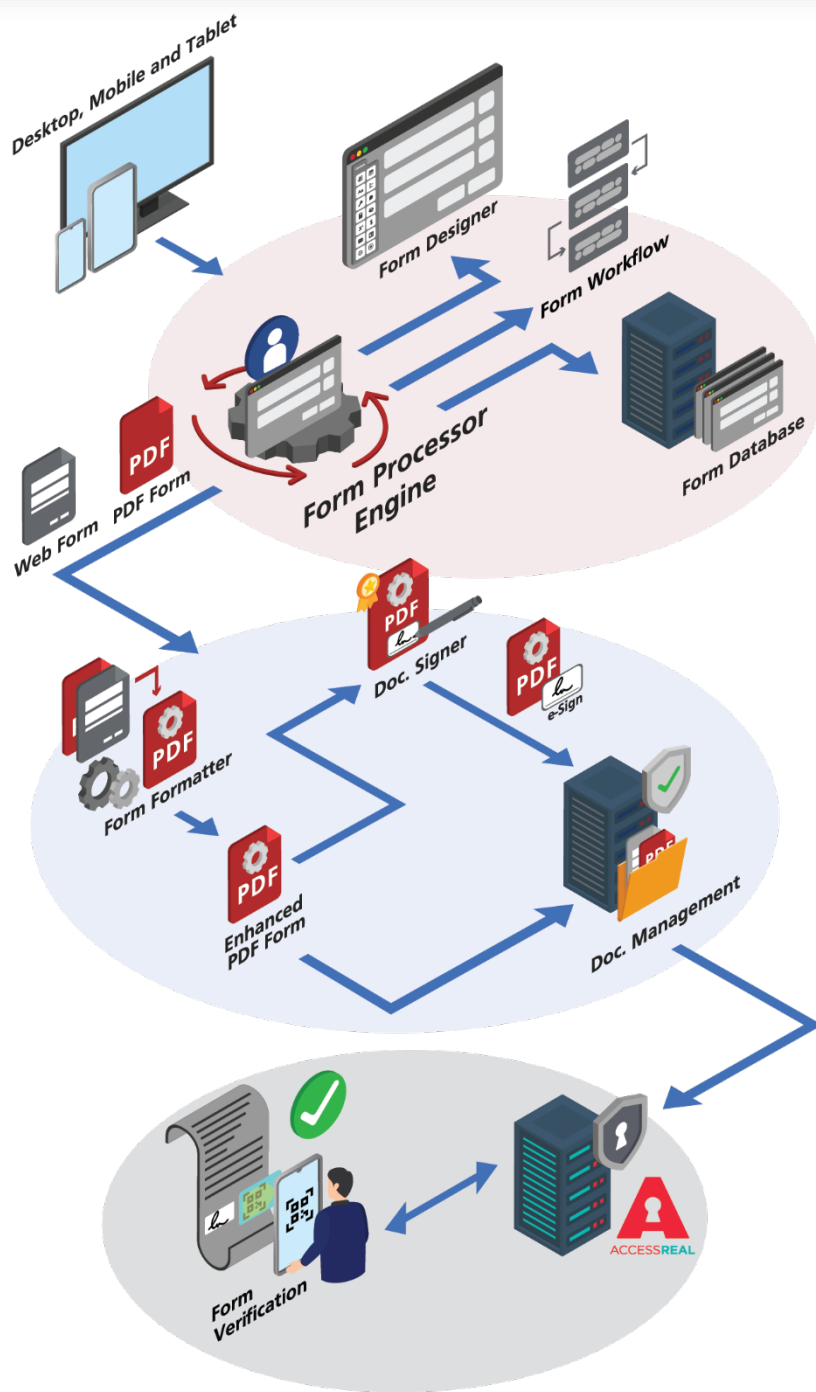

Support multiple languages for forms and PDF output files.

Advanced Encryption

Compliant with PDPA, GDPR, and top industry security standards.

Digital Form Management System

1

Form Management Module

Web-based form designer streamlines the creation of forms.

Automated workflows allow section-based routing of forms and signing.

Form data encryption ensures adherence to industry security standards.

2

Document Management Module

Data collected from forms can be imported into pre-designed templates for professional output..

Document Signer enables secure e-signatures (PKI-based) or digital signatures with CA-certified certificates.

Documents are securely encrypted during storage to prevent unauthorized access.

3

Document Verification Module

Support document authenticity by integrating a tamper-proof security label with a unique serial number and a clone proof code directly onto the physical document.

Allow anyone to verify document's authenticity through mobile app scanning.
